It is rumored that the Phillipsburg school will be bereft of one of its valued teachers in the near future. The source of this information is received in a letter from a lady teacher in Illinois to the Phillipsburg school board applying for a position. The lady informs the board that a vacancy is shortly to occur and asks for the appointment to fill the same. She also says that she is not at liberty to reveal the identity of the teacher who contemplates her resignation. All of our lady teachers being of marriageable age it is rather difficult to fasten a suspicion on any particular one, but considerable speculation is rife, nevertheless, and a few "knowing ones" "wink the other eye."

GRANITE MINE TO START

A General Resumption of the Greatest Silver Mines on Earth to Take Place.

RETURN OF PROSPEROUS TIMES

Phillipsburg Real Estate Demands a Good Price—Unusual Activity in This Section Is Anticipated—Many Men Will Be Employed.

Reports are current that additional men will be put to work in the Bimetallic mine about the 15th of the present month, and information from a reliable source is at hand that a general resumption of the Granite and Bimetallic mines will occur about that time. Active preparations have for some time been going on, and it is said the company is now ready to begin operations in earnest. The Bimetallic mill will be run to its full capacity and the present force of miners doubled. Both mines will be turning out ore like in former years and the bullion shipments will again be conspicuously in evidence before many more days pass by.

Engineers have already been engaged and the pumps at the Granite mine will be started as soon as they arrive. The tunnel connecting the Granite mine with the Bimetallic at the 1400 foot level is nearly completed, and as soon as the water is pumped from the Granite to that depth the connection will be made. Both mines will be operated, and the ore is to be hoisted through the Bimetallic shaft. A full force of miners will be employed. Since the consolidation of the two companies, the mines can be worked on a much more economic scale than heretofore, and there will be no further cessation of operations as long as the ore bodies in the mines hold out.

It is said that the electric power plant at Flint Creek falls will also be pushed to completion this summer, and active operations will be resumed at that place as early as the weather will permit.

Business men and residents of the community in general feel greatly encouraged over the prospects for the future and the year 1899 promises to bring more prosperity than Granite county has experienced in several years and a general return of prosperous times is anticipated.

Several important real estate transfers have taken place here during the past two weeks and no doubt the assurance of returning prosperity was chiefly instrumental in encouraging capital to seek investment in the immediate vicinity of the greatest silver mines on earth. Prices paid for Granite county real estate in and around Phillipsburg, recently, would indicate that conservative business men have every confidence in the future of this section and all indications point toward a series of unusually prosperous years.

BROADWAY PROPERTY SOLD.

Frank Durand Pays \$13,500 for a Phillipsburg Business Property.

An action commenced by Joseph A. Hyde and J. H. King against Frank Durand for the partition of certain Phillipsburg real estate which had been owned in common by the above named gentlemen, came up before Daniel Arms, who had been appointed referee in the case, last Tuesday. The property included the large store building formerly owned by Freyschlag, Huffman & Co., and some less valuable lots near the depot. Mr. King opened by bidding \$13,000 for the property. Mr. Durand raised him \$500, and there being no other bid the real estate passed into his possession, and as soon as the court confirms the sale the deeds will be made out. The original cost of the property sold was something like \$30,000, and it is believed that Mr. Durand has made a good purchase.

JOHN P. NOLAN NO MORE.

The Well Known Former Phillipsburg Resident Dies in Butte.

News has reached this city that Mr. J. P. Nolan, a well known former resident of Kirkville, died at his home in Butte on December 21. The cause of his death is not known, and although several prominent physicians were in attendance and he was accorded the tenderest nursing his life could not be prolonged. Mr. Nolan had, previous to his departure for Butte about two years ago, been for many years a prominent citizen in this community and conducted the well known hotel at Kirkville. Deceased leaves a wife and two children in Butte, a brother in this state and mother and sister in Ireland. He was about 47 years of age and was born in Dublin, Ireland.

Mr. Nolan was a man of many sterling qualities and an honorable and respected citizen. The Mail joins the many friends of the family in extending its sincerest sympathy to the bereaved relatives in their sad affliction.

AN ILLUSTRATED HISTORY OF OUR WAR WITH SPAIN.

By Hon. H. B. Russell, Senator Proctor and Senator Thurston.

This magnificently illustrated, richly filled and scholarly volume gives a complete and authentic history of the Spanish-American war from its beginning to its close. Its authors are three widely known men, Hon. Henry B. Russell, the distinguished historian, Hon. Redfield Proctor, senator from Vermont and ex-secretary of the war, and Hon. John M. Thurston, senator from Nebraska.

The subject naturally divides itself into two parts: I. How we got into the war with Spain; and II. How we got out of it and with what results. This volume tells the whole story, clear all the causes of action that led up to and culminated in the conflict, gives pen pictures of those who figured in it, and relates many exciting incidents, brave deeds and thrilling adventures connected with the struggle. The mutterings of the distant war cloud, the indignation and uprising of the whole people, north and south, when the veterans of the blue and the veterans of the gray took their places side by side behind the same flag, the departure of fleets of powerful modern warships, the march of hostile armies, the strife and carnage of battle on land and sea, the deeds of valor and heroic sufferings of our gallant soldiers and sailors in field and hospital, all are portrayed with consummate skill.

Every event is placed in chronological order, and the fullest and most authoritative statistics are given. As might be expected from the high positions filled by its distinguished authors, the war and navy departments and other branches of the government extended every possible aid to make this volume not only a standard and official history of the war, but the most complete, well rounded and elaborate record of the struggle that has ever been written. No three living American writers could more fitly assume this responsible task or produce a more honest, truthful and impartial book. Their entire familiarity with the political history of the country, their fund of statistical information, their independence and fearlessness, all guarantee that this work is one of more than ordinary value. It presents a deeper, broader, more exhaustive exhibit of the long train of causes which culminated in the conflict than can be found in any other work. It is the most ample, brilliant and readable book that the war has called forth. It is not only rich in historical information, but as instructive in its method of presentation as it is fascinating in narrative. It is, in our opinion, the only book that rises to the dignity of a real history of the Spanish-American conflict. It needs no better introduction to the eighty millions of Americans than the names of its three illustrious authors.

The magnificent illustrations include a series of seven superb steel plate portraits of President McKinley (from a photograph approved by himself), Generals Miles, Shafter, and Merritt, and Admirals Dewey, Sampson and Schley. It is worthy of note that these are the only steel plate portraits of these famous men ever published. It also contains colored and elaborate maps showing in great detail Cuba, the Philippines, Porto Rico, the Hawaiian Islands, etc. There are, besides a large number of maps and diagrams inserted in the text to illustrate battles, campaigns, naval operations, etc. There are also 32 magnificent full-page illustrations. In the preparation of these maps, steel plates and illustrations no expense or pains have been spared to make them all that art, skill, and talent could produce. In no other history of the war can anything even approaching them be found.

It is worth more than all other books and manuals on this subject, nor in them all combined can be found so much solid information as this thoroughly standard high-class book contains, which has, in addition, many beautiful illustrations and the inestimable value of being truthful. If we speak warmly of this book, it is because it is richly worth all the praise that can be bestowed upon it.

The book is sold only by agents, and is published by the old and reliable firm of A. D. Worthington & Co., whose imprint is sufficient guarantee of the excellence of this first-class volume. They want more agents for it, and its sale offers about as good a chance to earn money as we have seen in many a day.

All Work Guaranteed to Give Perfect Satisfaction or Your Money Refunded.

Among the reasons which commend me to those requiring the services of a watchmaker are the following:

(1) Having for over 25 years given perfect satisfaction to the world's most eminent horologists of Dresden, Paris, London, Shanghai, Yokohama and San Francisco, proof of which I have in their own handwriting, patrons are absolutely secure against the botching of their timekeepers, which is of no small importance when it is considered that, with rare exception, watches are not worn out by their owners, but are ruined by bad workmanship.

(2) An honest guarantee is given for one year, during which space of time watches are cleaned several times, if need be, free of charge.

Respectfully,
